VOLUME V, NUMBER 35 THE GOLD CENTER THE NEVADA CITY NUGGET, CALIFORNIA THE COUNTY SEAT PAPER FRIDAY, AUG 14, 1931

MUCH MINING ACTIVITY NOTED IN DISTRICT AROUND NEVADA CITY

In going over a list of mines in the last few weeks we have come to the conclusion that there are fully 1500 men employed in quartz and gravel mining in Nevada and Sierra Counties.

In the Nevada City District we have the Murchie, Mr. O. McCraney, superintendent, with 150 men; Nevada County Mines Corporation, J. M. Hoff, manager, 125 men; Hoge Development Co., A. M. Hoge, superintendent, 20 men, with more to be employed as soon as machinery arrives; Queen Lil, 4 or 5 men; Davis Bros. 2 or 3 men; Cement Hill, Mr. Balls, superintendent, a small crew; New Merrifield, Mr. Fonce, leasor, 8 men; Quaker Hill Mining Company, Mr. Botting, manager, small crew working; Steep Hollow, J.M. Hoff, manager, small crew working; Thomas Coan is reopening his property, Mr. Gruenwald is developing his mine.

This makes about 350 men on payrolls in the Nevada City Mining District.

In the Grass Valley District, the North Star-Empire Mines Co., Mr. Nobs, manager; has about 500 men employed; Idaho-Maryland, Mr. E. MacBoyle, manager, 130 men employed, Alcalde, Sunrise and Development Co., are each reopening; Golden Center, Colley Butler Interests, crew of men working; Boundary, M. J. Brock, superintendent, crew of men working. This makes about 800 men on payroll in the Grass Valley Mining District.

In the Washingtoon District there are the Spanish, Mr. Bradley, superintendent; Eagle Bird; Greystone, Mr. Hegarty, manager; Ancho, Mr. Gordon Bettles, superintendent, that have come to our mind, and all are working crews of men.

In the Spenceville section there is the Newtown Mining Company, Mr. E. Jacobs, manager with a good sized crew working and more to be employed as the machinery is installed.

In the Sweetland District is the Boss mine with 4 men.

In the Camptonville District, Jouberts Gravel mine, Alta View, Mount Alta, with crews of men working. The Salmon mine is preparing to reopen as soon as machinery is assembled.

Along the North , South, and Middle branches of the Yuba River near North Columbia, are Paine Bros. ; River Placers, Ltd., Seven Come Eleven, Mumm and Ramsey, as managers; Indian Mine, A. G. Martin, leasor.

In the Goodyears Bar District are about a dozen mines operating, and among them are, Kate Hardy, Gold Bar, Tim Dolan, and Kirkpatric.

Around Downieville are several the one coming to mind at present being the City of Six, and Standard.

In the Sierra City District are Colombo, Mr. Campbell, manager; Primrose, Commander, Butte Consolidated Mines Company, etc.

In the Alleghany District the Sixteen to One Mine is employing about 80 men, the Oro Flame 4 men; The Yellow Jacket Mine, and there are several others working. Gravel sluicing along Kanaka Creek is a well known source of gold yielding.

Gravel sluicing is also being carried on on the Bear River, Deer Creek and Green Horn streams.

In referring to Nevada City, which is the the heart of themost active gold prodcution, business men of the state refer to it as the livest town of all. A good payroll keeps a town alive and progressing.

Most of this prosperity has come to the gold producing section within the last four years. Just glancing back four years ago at The Nugget files we have the following:

In the early part of 1927, The Western Merger was just getting ready to sink a 375 foot shaft; Some gravel properties were working in the Washington Mining District; Gravel was struck in the Gold Lead at Graniteville; The North Star spent a large sum of money in developing the property; Twin Sister to prosecute lower tunnel; American Flag driving tunnel; Paine Bros. start development work; Mines reopening in Alleghany District; Interest in mines of Forest.

In June of 1927 the Murchie mine was reopened by J. M. Hoff; Grizzly Ridge starting third drill sinking; Allison Ranch unwatering by New York interests.

The Empire Mine of Grass Valley has been operating for about 80 years.

If such a thrifty condition exists after a period of only four years with the interest being displayed at the present time, we may expect the mines to increase twofold by the end of another four years.

NEWMONT AIDS HOGE COMPANY

It has been rumored around on the streets for the past several days that the Hoge Development om_pany were selling out to the Newmont Mining Company of New oYrk City, but in an interview today with Arthur W. Hoge, the President of the Hoge Development Company, he authirizes the Nugget to make the following statement of the facts:

Previous to the recent arrival of Fred Searles. Jr., President of the Newmont Company, negotiations had been carried on by Mr. Hoge between Mr. Searles and Mr. Simkins, in reference to their becoming interested for the purpose of deeper developments, and the erection of a modrn oil flotation plant.

Upon the arrival of Mr. Searles, he and Messrs. Simkins and Nobs made an examination of the Hoge properties, and a deal was coonsum_mated to the satisfaction of all concerned.

The operating Company will be under the direction of Arthur W. Hoge, President, Fred Searles, Jr.., Vice President and Consulting Engineer, Otto E. Schiffner, General Manager, Charles L.. Walther, Chairman of Boardr of Directos, and Arthur M. Hoge, Secretary and Treasurer. Shaft sinking has already been started, and no further ore shipments will be made, except to the North Star mill for the purpose of making treatment tests, preparatory to the erection of a modern oil flotation mill on the property.

There is over 4000 tons of good ore already on the dump, and at least 20,000 tons of development ore ready for milling, so by te time the mill is completed in the early part of 1932, the deeper levels will be opened up to the 600 foot level and the probabilities are that there will be a developed tonnage of at least 40,000 tons when the program is completed.

Messrs. Hoge and Searles are old friends, and they are both to be con_gratulated upon having made a satisfactory deal that will undoubtedly be of benefit to their respective companies, and at last, but not least, also for the benefit of Nevada City, the home of the two principals in the deal.

SPANISH MINE IS GOOD PRODUCER

It is with pleasure that we wirte this article on one of Nevada County's most noted mines, that has a romance connected with is as well as being a good producer.

The Spanish Mine is 1600 feet deep with 3000 feet to drive to reach the Byrites Camp. The present camp is new work down at the edge of Poorman's Creek. The cook_house of the property being on one side of the creek and the portal of the tunnel on the opposite side. The shaft raise is connecting the 16 tunnel to No. 4 tunnel with 255 feet between tracks, with cage and hoist.

This new mine has two stopes opened up. The distance between the hanging and foot walls varies from 2 to 12 feet. The character of the rock is slate formation. The ledge being worked at present is on the footwall of a big dyke of quartzite.

There is enough ore in sight to last 50 years. The workings are so situated as to give them 800 feet of backs, in fact it is a mountain the company is working into.

The ore is composed of bornite and gold, with the ledge matter now being worked 4 feet thick on the hanging wall, which is very nearly pure barite. Barite is used in paint and cement work. This cement is of a very peculiar quality, being used in the cementing in of oil wells in capping operations. It is also used in capping oil wells where heavy pressure is found in the oil wells with a heavy flow of natural gas. Recent state rulings on oil wells has reduced the sale of barite to a certain extent. There is often a great per cent of iron mixed in much of the barite which makes extraction costly. Such is not the case at the Spanish Mine.

The Spanish Mine is equipped with a 200 ton, 24-hour capacity ball mill with flotation process if 3 shifts of miners are working. At present 30 men are working 2 shifts.

The mine is shipping concentrates regularly to Selby's over the Nar_row Gauge Railroad from Nevada City.

The mine is entirely electrically equipped, having electric haulage, and all machinery is electrically driven saving much time and expense in operations. Power is obtained from the recently constructed power line coming in from Alleghany.

Mr. Phil Bradley, son of the original owner of the mine, is superintendent of the property.

The Spanish Mine is one of about six large properties held and operated by the Bradley Interests. Some of them are Juneau-Alaska in Alaska,; Treadwell Youkon Company, Bunker Hill & Sullivan Concentrated Co., subsidiary to Juneau Alaska; with a large holding at Bodie, near the Nevada state line in California situated in about the middle of the state; and large holdings in Idaho and Arizona.

BELLFONTAINE IN WILLOW VALLEY TO BE REOPENED IMMEDIATELY

Immediate reopening of the old Bellefontaine Mine in Willow Valley by the Hoff organization is announced this week by J. M. Hoff who has just completed and placed in operation the St. Louis Mill on Deer Creek.

The work on the Bellefontaine has been assigned to Engineer Richard L. Lile, formerly with the Oronoco Development Company of South America, who was special consultant for King Gillett in his Mexican mining operations. From Tennessee, he was more recently with the Idaho_Maryland Mine on flotation and joins the Hoff forces with an ample background of experience in the work he is undertaking.

A force of men are now at work on the old surface structures and the shaft. The Federal Loan Mine headframe is being moved to the Bellefontaine and compressor pipe line is being run from the St. Louis ti the new operations and new sets of timber are being placed. Esuip_ment for the Bellefontaine is being moved from the old Montock Mine east of Auburn on the Rattlesnake Road. This property, shut down for many years, is owned by Mebius and Drescher of Sacramento and is to be later surveyed for possible development by Hoff. Fire recently destroyed the surfoce structures on this property but left the machinery and equipment unimparied.

The Bellefontaine Mine is located on Deer Crtek just south of the St. Louis and Jackson Mines, now under operation, which has been idle for over twenty years. The shaft is four hundred feet deep and the two hundred foot level has been developed east eight hundred feet. Drifts easterly have been made on the three hundred and four hundred foot levels but for a very short distance. There is an intermediate drift between the two hundred and three hundred foot levels of about four hundred feet easterly. The three hundred foot level contains the laregst stope in the mine which is only stoped up about forty feet. The length of the stope on this level is only one hundred feet long. Work has been planned to drift out on the four hundred foot level to pick up the ore body under this stope.

The Bellefontaine Mill is being overhauled and re-timbered and will be equipped with flotation cells. A ball mill is being hauled to the mill site and ten 1150 pound stamps will be operated.

Announcement of operations at the Bellefontaine comes incident to the organization of the Nevada Mines Corporation by Mr. Hoff and A. Gordon Nicolson, President of the Company. Henry Davidson, engineer in charge of all the Hoff organization work, will have general supervision of Bellefontaine operations at the St. Louis Mill and the Constitution, Cyane, Jackson and St. Louis Mines. The Hoff organization is in control of some twenty-two claims on Deer Creek immediately tast of the Murchie Mine, which Hoff de_watered and placed in production three years ago.

BALL MILL INSTALLED AT IDAHO-MARYLAND

A ball mill is being conditioned in San Francisco for shipment to the Idaho-Maryland mine and will be installed at the Brunswick mill. The ball mill which is 5x7 in dimension is to be used for the finer grinding necessary for the recently installed flotation plant which has made excellent showing under the condition.

Development work at the Idaho-Maryland is being continued. They are working upward from the 2000 foot level and are planning to cut a station at the 1400 foot level.

SEEK ORE VALUES AT BOSS MINE NEAR SAN JUAN

The Boss mine which was leased by the Bradley interests several months ago is working a crew of three men. The property is situated about two and a half miles west of San Juan. There is a 400 foot shaft on the property with four drifts off of the shaft. Sulphides were struck recently and a test is being made of the ore.

They are cutting through 150 feet of ledge matter consisting principally of porphyry, and it is in this that they have struck the promising looking sulphides.

If the property proves up to expectations a 2000 foot tunnel will be run from the opposite side of the mountain, it is reported.

EAGLE BIRD MINE WORKS CREW OF MEN AT MINE

The Eagle Bird Mine, which is nearly east of Washington, is working a crew of 20 men.

This property is situated on the Yuba river.

The holdings consist of Eagle Bird, Eagle Bird Ext., and Live Oak patented claims together with 160 acres of timber. The claims cover a length along the lode of 4500 feet south from the South Yuba river, elevation 3,500 to 5,000 feet at the top of the ridge.

The quartz filled fissure occurs in an area of granite and the walls, which are from 18 feet to 30 feet apart, are well defined.

This property was worked in the early days. In 1866 the shaft had reached a depth of 400 feet. The company owns a water right on the South Yuba of 1000 inches.

The Bagdad Copper Company of Arizona is working the property at the present time.

DEER CREEK LAND IS AWARDED TO PARDINI

A 1916 decision was upheld in the action of Reynolds vs. Porter, Register John C. Ing of the United States Land Office, Deparment of Interior branch at Sacramento at Sacramento, awarded about 10 acres or disputed property on Deer Creek to Louis Pardini, who purchased the tract from the United States Government early in the year.

During the sale of the isolated tract of public land at auction Cooley Butler had field for the property under the mining laws and Pardini and purchased the land under the agricultural laws.

FRED YOCUM PASSES TO GREAT BEYOND

Fred F. Yocum of Railroad Avenue passed away Wednesday morning from an illness of some standing He had resided in Nevada City about a year, having lived in Grass Valley for some time previous to that.

He was born in Kansas about 54 years ago, but had spent 35 years of his life in California.

Left to mourn his passing are his widow; three sons, Charles, Fred and Jesse Yocum; two daughters, Estelle, and Mrs. Merle Douglas of Madera, a sister, Mrs. Yuba Lowrie and several grandchildren.

OLD PIONEER OF SIERRA COUNTY PASSEES AWAY

Mrs. Bertha Aiken, one of the oldest residents of Sierra County, passed away Thursday afternoon at at 1:20 at the age of 90 years.

She was born in Switzerland but has lived in Sierra County since 1864. Requiem high mass will be held Sunday morning at 11 o'clock by Rev Father O'Reilly

Inferment will be in the cemetery at Downieville.

TWO LOCAL BOYS ARE TO PLAY OVER STATION KPO

Carl Tamblyn, taltnted young violinist will make his appearance Wednesday a. m. over Sta. KPO in San Francisco. Carlton Peters formerly of Grass Valley will accompany him on organ and piano.

Chester Scheemer of the Plaza Grocery Store, and Will Walsh were in Forest Wednesday.

HIGH GRADE ORE FOUND IN JAY MINING CLAIM

Mr. Peterson of the North Bloomfield District has struck high grade ore in a 150 foot tunnel driven into a slate and porphyry ledge six feet in width. It is free milling rock and samples have been sent away for an assay.

The ledge shows up on the surface and Mr. Peterson run the tunnel in at a lower level in order to test the quality of the ore and get exact width of the ledge at depth. The ledge so far is holding to the six foot width.

This property is east of the town of North Bloomfield and Mr. Peterson should be richly rewarded for perserverance in the opening of this property. He has been working on this claim since 1919.

Carter Bros. who are working the old Indian mine are not far from Mr. Peterson's property.

GOYNE ELECTED FIRE CHIEF

At a recent election of Nevada City Fire Department, Richar Goyne was elected Chief of Pennsylvania Engine Co., No. 2 and Byron Landrigan of Nevada City Hose Co. No 1 is assistant. Otis Hardt is retiring chief. He served well and faithfully.

INDIAN MINE RUNS TUNNEL ON THE YUBA RIVER

Mr. A. G. Martin has a lease and bond the old Carter mine, also known as the Indian Mine, on the Yuba River. In the last four months he has driven a 360 foot tunnel in which he expects to contact a ledge that crops out higher up on the mountain. Mr. Martin dropped down the mountain 240 feet from where the ledge shows on the surface and started operations.

This mine is in the serpentine and slate belt where many gold producing mines are located.

Track has been laid in the tunnel and ore cars are used to carry away muck to the dump.

MRS. WILL YOUNG UNDERGOES A PAINFUL FOOT OPERATION

Mrs. Will Young was operated upon the middle of last week for an injury to her foot.

It is proving quite painful and she will be laid up for some time.

EL ORO AND CLIPPER SHIP TAKEN OVER BY EASTERNS

The El Oro mine about 11 miles above Nevada City and the Clipper Ship near Sierra City have been taken over by Eastern mining men.

These are both gravel properties the Clipper Ship comprising about 56 acres. This property has a past production of $40,000 as listed in county records.

Mr. Abadie, mining man of Nevada City brought in a telegram Thursday afternoon which requested that the news of the taking over of the following properties be mentioned in this issue of The Nugget. More will follow in another issue.

Right About Face at the Fair

MINING PERSONALS

Mr. and Mrs. J. Trembath, are in Nevada City looking over the district with a view of settling here. He is a mining engineer from the state of Nevada.

Mrs. Harry B. Skewes of Grass Valley is home after spending some time with her husband at Alleghany. He is connected with the Sixteen to One mine. Mr Skewes is in charge of the Western Mergen[illegible]nortvada City for a time.

T. Burke of the Spanish mine was a Nevada City visitor Sunday.

A. C. Sommers of the Empire mine spent Sunday in Nevada City.

Mr. Hatch from Sierra City is connected with the Nonpareil mining interests, was a visitor

could be presented to the State that [illegible] ture at its session starting January second.

In securing the services of Rob[illegible] Valley in the City of Pa[illegible] Mr. Hatch will be considered [illegible] Nevada City for a time.

DICKEY BOY, LIMITED SHOWS GOOD VALUES

Sonora Calif., August 14—In a recent mill test on three tons of ore the Dickey Boy Mine, Ltd., controlled by Lee R. Cordray of Los Angeles and associates and operating the Dickey Boy property on Sullivan Creek, two miles south of Sonora, obtained by amalgamation $9 a ton in gold. The resultant concentrates, amounting to eight per cent gave an assay return of $180.55 a ton in gold, it is officially stated. The combined recoveries give the ore a total value of more than $23 a ton. The ore tested was extracted from a shoot showing a width of seven feet in the bottom of a 97-foot vertical shaft, which has just been retimbered preliminary to its continuation to a depth of 300 feet on the main vein, which traverses the property in a northwesterly and southeasterly direction, according to Manager Cordroay.

At present the mine crew is confining work to the extension of a new drift tunnel on a cross vein in which there is an eight-inch streak of ore assaying $60 a ton in gold. It is estimated by Mr. Cordray that it will be necessary to drive the new adit a total distance of 180 feet to reveal the junction of the cross ledge with the main vein, at which point a vertical depth of 150 feet will be gained. He states that a 25-horsepower electric hoist, a four-drill compressor and machine drills will be installed in the immediate future to expedite operations. The company is also planning the early erection of a reduction plant, which will include a ten-stamp mill and 50-ton ball mill.

C. A. Gillis of Tuttletown, who, with C. H Holbrook, Jr, of San Francisco, is operating the Argo mine, ten miles east of Groveland, announces that within the next ten days the three-stamp mill on the property will be placed in commission treating ore being extracted in the extension of the south drift on the bottom or 100-foot level of the incline shaft. Thus far the drift has been extended 275 feet. For the last 120 feet the drift has been exposing an ore body averaging in width two feet and in value $25 a ton in gold. The ore continues in the face. At the 250-foot point in the drift a station is being cut preliminary to making a winze in the orebody. An air hoist and pump will be installed to facilitate this work. Mr. Gillis states.

John Porah is employing a crew of miners in the sinking of an incline shaft on his property on Bull Creek, 12 miles northeast of Coulterville. The shaft, now down 80 feet, is exposing an 18 inch vein.

VANDEGRIFT MORE THAN LIKELY GETS THE POSITION

Information was brought from Pasadena in the last few days that Rolland A. Vandegrift will likely be named Manager of the City of Pasadena at a meeting of the City Council within the next ten days.

His ability as a financiar has been proven on many occasions.

The selection of Vandegrift by Governor James Rolph for the position of State Finance Director is ample proof that he knows the tax question to its lowest depths.

He was selected by the governor following [illegible]

TROUT AGREE COPPER BETTER THAN PEBBLES

Although great countries are constantly tussling with the silver-gold standard problems, trout at the Yosemite hatchery of the Division of Fish and Game have stolen the march and readily agree on copper.

Of course there may be a number of sly angles to this copper standard business and perhaps a line of discussion would not be amiss.

It seems that there is a beautiful outdoor aquarium at the above named hatchery. It also seems that interested spectators are in the habit of tossing pebbles into the water in order to see the fine big trout rise and strike.

Now then, Peter Topp, the fellow who cares for these trout, soon discovered that the cleaning problem had assumed the proportions of a major activity. Shoveling piles and piles of pebbles from the acquarium during the sombre moments after the crowds had disappeared sort of appealed to his inventive sense of mind.

One day he dropped a shiny copper penny into the pool. The trout nearly butted each other out of the tank to get at the lure. After a quick nibble the successful trout merely dropped the copper to the bottom.

And this is how the pebble tossing ended. As soon as a crowd of probable pebble throwers assemble, Topp would edge up to the tank and casually toss a penny to the fishes—the effect was almost magnetic on fish and spectator alike. Pebbles retired in dismay.

Soon a regular shower of pennies slithered through the water. The bottom of the acquarium assumed a beautiful coppery lustre.

Thus the die was cast. The cleaning process is not nearly so laborious, according to reports, and the state hatchery is gathering quite a "striking" fund.

Will some one kindly step forward with a few dimes or quarters?

LOS ANGELES INTERESTS BUY REPUBLIC MINE

Jamestown, Calif., August 14—H. D. Meyer, F. A. Virtue and associates of Los Angeles have purchased from the State of California the Republican mine, notable early day producer, and contiguous property, embracing, in all, 197 acres, on Woods Creek, eight miles south of Jamestown, and plan its immediate rehabilitation. The property is credited with a past production of $500, 000. It has a 600-foot incline shaft, with lateral workings aggregating, it is said, more than 4,000 feet, which were extended 25 years ago. The property is traversed by a huge vein of free milling ore, it is stated. The new owners, it is learned plan the early buliding of a dam on Woods Creek two miles from the property and erection of a 20-stamp mill on the mine.

John D. Garaventa and Odelia Restano are pushing the development of their Hendrickson property at Shaw's Flat, five miles north of Jamestown. Their incline shaft is nearing the 200-foot point, at which crosscutting will be inaugurated. The shaft is exposing eight inches of gold ore which pans well, it is

ticle shows that gold is bet in all sections of the ates:

'OOD, S. D.,—Gold pan s have started placer min- Black Hills streams with at rivals the famous 1876

of the unemployment dd the rise in value of men have staked out all ound and in some cases led elaborate equipment to coax the yellow gold from its hiding place. Rockers, sluice boxes, Long Toms and modern gold machines are a common sight along French Creek, Bear Creek and Potato Gulch.

Miners claim that they are making good wages. Henry Raver, whose dairy farm supplied President Coolidge with milk while he was at the state lodge, found placer mining more profitable than dairy farming.

He has been averaging about two dollars a yard, and is reported to have made as much as $25 in one day. On this farm $40,000 in gold was mined in the '70's during a single month.

"Potato Creek" Johnny Perett, recently found a nugget valued at $150 and another at $40 and last year sold one that was worth $250. Other prospectors in the Potato Creek district average from $5 to $8 a day.

The prospectors use various methods and the favorite, commonest and least expensive seems to be the pick, shovel and gold pan. By this method the miner picks loose the rocks, shovels coarse gravel into the pan, takes it to the side of a running stream and lets the water do the work.

A modern machine, however, is at work on French Creek. The ore is shoveled into an ore bin, and from bin into a funnel, where water washes the dirt into a large circular rotating machine which operates by centifrugal force in much the same manner as a cream separator. The whirling bowl is cleaned out each night and a little panning separates the gold from the gravel.

The gold is sent to the mint at Denver by the storekeepers, who buy it from the prospectors, or sold to a bank.

MOTHER LODE COUNTIES TO SEEK WATER PLAN

The Calaveras County Chamber of Commerce headed by D. Fricot will sponsor a meeting of representatives of the mountain counties at the Calaveras cement plant on September 24, at which time the plans for the mountain counties water conservation program will be discussed. Counties invited to send delegations are Nevada, Placer, El Dorado, Amador, Mariposa and Tuolumne. State Senators, Assemblymen, State Director of Publir Works, Walter Garrison, Edward Hyatt, state engineer and irrigation district chiefs are also invited to be present and take part n the discussion.

In the afternoon of September 24 an executive meeting of the mountain counties delegation will be held where plans will be discussed on the program for the meeting.

The conservationists headed by D. Fricot hope to work out a coordinated plan that will be recognized by the state committee of the state chamber of commerce and the legislative water committee, which will give the mountain counties some protection in the new water legislation that is expected to be enacted at the special session of the state legislature next January.

For the past ten year, Mr. Fricot and the conservationists of the mountain counties have been working on a plan to conserve enough water in the mountain counties for their future use. Twice a bill has been passed by the legislature, only to be killed by the governor veto.

STAT GOLD PRODUCTION IN MILLION DOLLAR GAIN

California still may be called the "Golden State."

According to figures on file with the state bureau of commerce, the production of gold amounted to more than $9,450,000 in 1930, a gain of more than $1,000,000,000 over the previous year.

The production amounted to 457,199 fine ounces. Silver production also increased, raising from 1,176,895 ounces in 1929 to 1,622,-803 last year.

You and I

by CHARLES S. KINNISON

LIFE LINES

Ah, no—you're not as youthful now
As when you came to me—
And yet, those furrows in your brow,
My Dear, I seldom see.
But when I do observe them, though,
And sometimes see a hair
Or two, that's turning gray, I know
I helped to put them there!

But as I see your youth depart
And middle age draw near,
I do not pine, with yearning heart,
For one more youthful year!
For though, of course, we older grow,
And each year takes its due,
Both you and I as lovers know
Life grows the sweeter, too.

NEW MOTORING LAWS IN EFFECT FRIDAY

Changes in the California Vehicle Act adopted at the last session of the Legislature became effective next Friday, August 14. A summary of some of the more important new laws is presented by the Legal Department of the California State Automobile Association as follows:

Speed limits are raised five miles an hour in open territory, to 45 miles; in residence sections, to 25 miles; and in business districts, to 20 miles. The limit of 15 miles remains unchanged at intersections and grade crossings where the view is unobstructed; on "blind" curves; and in school zones. Driving so slowly as to impede normal progress of traffic is made unlawful.

Minimum age for issuance of operator's license is raised from 14 to 16 years, with provision for license to minors between 14 and 16 on special application of parent or guardian.

Vehicles must be mechanically safe and officers are authorized to make inspections and require correction of defects.

Passing on the right is made legal only on city streets wide enough for two or more lines of traffic moving in the same direction.

When overtaking and passing another vehicle there must be sufficient clearance ahead to permit doing so without endangering either the overtaken vehicle or approaching traffic.

Front seats shall not be so crowded as to interfere with the driver's view or his control of the car.

The descending driver on a one-way grade must back up to permit an ascending car to pass.

It is made a felony to take a vehicle without the owenr's consent.

Pedestrians have the right of way at marked crosswalks and as ends of blocks,, whether marked or not. Pedestrians must yield to vehicles when crossing at other points.

LIKING TO NEVADA CITY SAN DIEGO VISITORS TAKE

Mr. and Mrs. H. R. Shaw of San Diego arrived in Nevada City Sunday and have been here but a few days, but are pleased with our city and climate. While San Diego has a wonderful climate of even temperature it is too much the sameness for many people. Mr. Shaw's health was not good, but the southern city did not benefit him as much as it should have. In only a few hours time he has noticed a change in appetite and sleeping.

His son, Ben Shaw, was talking to a miner and upon being asked if he wanted work and the answer was in the affirmative, he was told later in the day to be ready to go to work in the morning in one of the local mines.

With the wonderful climate of the southern city it is a compliment to our section to have people visit and become so well pleased they decide to remain.

FRENCH CORRAL NEWS

FRENCH CORRAL, Aug. 13., (Special to The Nugget)— We are glad to state that we have had relaxation from fire scares, during the past week. The weather has moderated some but it is yet too warm for comfort.

The situation is certainly severe for some who have stock to take care of. Feed all burned off with forest fires, and pastures all dried up for lack of irrigation water.

W. E. Moulton has been busy during the week installing a pump in the Bedrock pond froom which he hopes to supply water for the irrigation of gardens and orchards.

Mrs. K. Sullivan and Miss Nelly Sullivan were visitors in Grass Valley and Nevada City Wednesday. They were accompaned by L. Haslett

Joseph Swazey and Lloyd Haslett made a business trip to Nevada City Friday.

Mrs Adele Browning and little nbrotherIgyy,io,fbe,S z xhrdluldr sons returned to her home Saturday evening after spending several days with her friend, Miss Millie Clerkin at her home above Pike City.

Mrs. Grace Olievs and Mrs. Belle Taylor of Marysville are spending a vacation in French Corral.

J. Jewel of Marysville is a French Corral visitor.

A. Browning and son, Clyde, spent the week end at their home in French Corral. Mr. Browning met with another accident recently in which he injured his snoulder and was confined to the hospital in Sacramento for several days.

J. Sheves made a business trip to this place Sunday.

Mr. and Mrs. G. Davis of Marysville were Sunday visitors. They were accompanied by their friend, Mrs. Lucille Hoffman Mills of Stockton. Mrs. Mills is a natice of French Corral, but her parents went to reside in Stockton when she was a little child of five years. She was delighted to meet friends of her childhood and to find that she had correctly in her memory scenes of that early date.

Mr. and Mrs. P.. M. Williams made a short call on their many friends in this place Sunday. Mr. Williams is a native of French Corral where he livel until manhood's years. For several years past he has been in the forestry service in the state of Washington, but in the past year has taken up his residence in Oroville, California.

Mr. and Mrs. F. Rundy of Sacramento were Sunday visitors. Both are residents of the San Juan Ridge

Mr and Mrs. Ira Slack and son, Sam, and his friend, Forrest Berg, were Sunday visitors. Mr. and Mrs. Slack are residents of Hollywood where Mr. Slack conducts a millinery and dress making business. They are finding much pleasure in a sojourn of several weeks in the quiet of the San Juan Ridge. Mr. Slack's parents were pioneers of this section and made their home in Sweetland.

Mr. and Mrs. Dewey Smith and daughter, Dolores, of Grass Valley were the guests of A. Browning and family Sunday.

Mr. L. Day and daughter of Nevada City made a trip to French Corral Monday.

F. Reeder of Sweetland made a business trip to French Corral today He was accompanied by Ralph, Warren and Eugene Thomas.

Joe Swazey went to Nevada City today. He has secured employment at that place.

0

EASY BIRD AND CENTRAL HILL START OPERATIONS

San Andreas, Calif., August 14— Having been completely reconditioned in the last few weeks, after being ille for 15 years, the 100-ton daily capacity ball mill and concentrating plant on the Easy Bird mine, on the Mokelumne Hill, will resume are re-Mokelhmne Hill, will resdme ore reduction within the next week, according to Manager Toll B. Elliott, who, with San Francisco associates, acquired the property, under lease and bond, from the Pacific Gold Mining and Milling Company about two months ago. Since then the new operators have dewatered and retimbered the 285-foot threecompartment vertical shaft and cleaned out the 100 and 200-foot levels, making immediately available large tonnages of excellent milling grade ore it is stated.

In order to more rapidly prosecute development work, B. J. Jeffrey and Los Angeles associates have increased operations from one to two shifts daily and their mine crew from four to eight men at the Central Hill mine, embracing 40 acres, three and a half miles southwest of San Andreas, which they recently acquired, under lease and bond, from W. M. Nuner and Thomas Jackson. After cleaning out and repairing an old 390-foot tunnel, an east crosscut was started at a point 200 feet from the portal. This working has been advanced about 80 feet and conditions prevailing in the face indicate that it should soon intersect the vein sought, which on the surface shows a width of 30 feet and pans well, it is stated. Drifting on the vein will follow completion of the crosscut.

0

MINES COMING FORWARD EAST OF AUBURN

The Paramount Mining Company are engaged in developing the Conrad and Centennial quartz mining properties on Section 17, Tp., 12 R. 8 E., one mile west of Auburn. A tunnel entrance from the Hope ground, which cross-cuts the Conrad ledge, has been purchased from Ira Thorpe. Tracks were laid and a compressor installed. A shaft sunk from the tunnel level on the Conrad ledge has produced some quartz well sprinkled with coarse gold. It is the intention of the company to develop the Centennial, a main ledge which paralells the Conrad. From a depth not greater than 250 feet the Centennial produced more than $200,000 in gold. The Conrad has also been a good producer. The Conrad and Centennial quartz mines are owned by Wm. M. Walsh of Auburn. We understand that the Paramount Company have taken options on a number of mining properties adjoining the Conrad and Centennial.

STAMPS DROPPING AT CENTRAL EUREKA MINE

Sutter Creek, Calif., August 14— Official figures, just made public, show that, with an average of 30 of the 40 stamps of the plant dropping and an average of 134 men employed in the mine and mill, gross mill returns of the Central Eureka Mining Company, operating in this town, for the quarter ended June 30th last, totalled $59,531.96 Ore treated during the quarter named and at present was and is being supplied by the 2,000, 2,100 and 2,300-foot levels of the Old Eureka mine section of the property, to which the management has for some time been confining operations.

All faces of the levels named, it is stated, are in ore and are being steadily extended to the north. On the 2,000 and 2,100 levels, the drifts, both about 800 feet in length have thus far proved an orebody for a length of more than 420 feet.. The 2,300-foot level drift, measuring at present about 700 feet in length, has developed thus far an ore shoot srowing a length of 100 feet. Development work in the Old Eureka section of the company's vast estate is being watched with keen interest by mining men in consequence of the past production of that area. State records show that, in the early days of California mining, the Old Eureka mine yielded ore valued in excess of $12,000,000 ,above the 1,700-foot level. Current development work and that planned for the future at deeper horizons should, in the opinion of mining talent add to the great wealth of yellow metal the mine has yielded to date.

Littleton Price, Los Angeles mining engineer, and associates of that city, under a lease and bond recently obtained, have inaugurated operations at the Montezuma mine, famous early day lode gold producer, seven miles north of Plymouth, with a view to its rehabilitation. Electric pumps are being installed to unwater the 1,000-foot incline shaft on the property.

0

CHROME DEPOSITS ARE BEING BOUGHT UP IN SISKIYOU CO.

Possible development of the chrome mines in Siskiyou county and the Klamath Basin, and attendant improvement of railroad transportation facilities in that region was foreseen with the admission of H. W. Gould, mining engineer, that he had acquired control of all chrome mines in that area.

Gould declared himself unable to make any statement at present regarding development of the mines, but indicated that an anniuncement might be made during the next month.

He also stated he was not in a position to state that he was acting as an agent for the United States Steel Corporation in the purchase of the mines.

Lack of railroad facilities have kept steel companies from developing the Siskiyou mines, A. H. Haynes, Columbia official, declared. At present most of the chrome used locally comes from eastern mines, and even from Greece and Europe.

Costs on chrome thus obtained from distant points is less than it would be on metal taken from the nearer mines, Haynes said, due to a complete lack of freighting facilities in the latter case.

Any development ofthe mines would be accomplished, therefore, by improvement of connecting rail lines. Neither Gould nor Haynes made any statement regarding plans in this direction.

Observe All Saints Day With Light and Music

In case any are further interested in the manner in which All Saints day is observed in Philippine cemeteries, we append the following additional characteristics of the annual celebration: The poor burn candles on the graves, while those who are financially able install electric lights. At night the cemeteries are seas of lights. Pictures of the departed persons are set up on the graves, and roving bands of musicians wend through the precincts and play pieces for them on the payment of 50 centavos (50 cents) by sorrowful relatives. The mausoleums of the rich are opened to the public, and long lines of persons course through them throughout the day and night.

The custom of playing lively rather than slow music in the cemeteries here is obscure, but it occurred during Spanish times. One story is that it originated during an appalling epidemic. People were dying by hundreds. The Spanish authorities, fearing the bad psychological effect of dirges, prohibited the playing of them. —North China Standard, Peiping.

Country of Forests

In the little republic of Latvia on the Baltic Riviera, more than one-third of the territory is covered by forest. Seaports and inland towns, villages and farmsteads are bidden to keep their distance. This sight of the monarchy of trees where the wild life of feather and fur has been immemorably happy is reserved for the traveler who seeks in the Old world places which are really olden, older than masonry and moats, as old as earliest time. Pine, fir and beech reign supreme, and in the Livonian Courland district the forests reach as far as the very dunes of the seacoast.

Mike Had the Last Word

Mulligan was proud of his newly granted American citizenship; but several of his friends liked to boast they were better Americans than he because they were native born. Mulligan couldn't see it, and one day became thoroughly exasperated with his friends.

"Th' divil take the lot o' yez!" he declared hotly. "Oi'm a betther American than any o' ye. At laste Oi had me pants on, and tin dollars in th' pocket o' thim whin Oi got here!"—Capper's Weekly.

VIKING RESTAURANT

MRS. ANDERSEN

BROAD ST. NEVADA CITY, CAL

"I've learned to forget about cooking dinner . . . since buying an Electric Range"

"BEFORE I bought an electric range, cooking dinner seemed to be always upon my mind. Now I can forget about it because my electric range cooks food automatically."

With an electric range you spend just enough time to put the meal in the oven. You set the time and temperature controls and leave the house if you wish, with the assurance that there will be a completely cooked meal awaiting your return.

For an average cost of 1c a meal per person for electric cooking you save hours of watching, waiting, stirring and basting. And electric cooking is as clean as sunshine. Then, too, the electric oven heats up to 400 degrees in 9 to 11 minutes. Platform cooking elements are faster.

Come in and see the electric range. You can have one installed for a few dollars down and a few dollars a month.

CAMPTONVILLE ITEMS

CAMPTONVILLE, Aug. 14—Another forest fire of apparent incendiary origin started Sunday afternoon in the Moonshine section, seven miles south of this place, which makes a total of four or five fires that have been fought in this locality. Forest Ranger Frank W. Meggers was soon at the scene with a crew of men and after considerable difficulty, put the conflagration under control.

F. G. Bishop, who is prospecting in the vicinity of Brandy City, nine miles north of here, finds lion hunting a good diversion from pocket hunting, when Tuesday morning he brought in the second California lion for the week A few days ago he killed a large one and yesterday morning bagged a smaller one. The bounty on the female is $30 and $20 on the male.

Judge W. B. Meek recently received a letter inquiring of the whereabouts of Joseph Allison, a former resident of this place. Allison's sister had died in the state of Washington and left him some insurance or other monies, and they were looking for him in order to deliver it to him. Allison, who formerly operated a mining property near here was sent to the insane asylum several years ago from Yuba County and is still a resident there

Misses Lesta H. Joubert and Helen Jackson motored to Nevada City Monday morning.

Burt Fulgham and little daughter of Sacramento were in town Monday enroute to the upper country.

Mr. and Mrs. Ed Lang and family motored to Nevada City Sunday on a short visit with relatives.

Fred B. Hanson motored to Nevada City Monday after a load or cement.

J. C. Schuster of Pike City was a visitor Monday.

William McCullough II of North San Juan was in town Monday.

Karl Kopp, popular Nevada City baker, was painfully injured Tuesday afternoon, eleven miles north of ere when he was hitting on the back of a truck while the truck was towing another car which was stranded up a steep hill. The truck flew out of gear and started backwards and before Kopp could get both legs out of the way, it caught him between the truck and the radiator of the other car, badly bruising his leg. First aid was rendered at this place on they way home Kopp was accompanying William Tamblyn, photographer of Nevada City.

J. A. Taylor, a newspaper solicitor, who canvassed the town yesterday, drove up to the Leader Garage, and while being serviced recognized the attendant, A. Gillette, as an old pal whom he had spent much time in the ormy with, the last time they saw each other was fifteen years ago in England. Taylor stayed over a day, and they talked over old times.

Edward Lang, grammar school pupil, was hit in the head with a ball bat Wednesday morning on the school grounds, rendering him unconscious and cutting a gash in the head over the eye brow. He was taken to Downieville where Dr. Carl C. Sutton gave the necessary medical attention.

Glenn Wiley of Browns Valley and party of friends passed thru town Friday entroute to Gold Lake

Erle Pauly, Mrs. Vivian Long, Hubert, Donald and B. Long and Myron Pauly left Thursday for Oakland.

M. G. Calvin killed a fair sized rattlesnake at the back door of his residence on Main Street a few days ago.

Fred Hanson and brother made a trip to Sacramento Thursday.

Fred J. Joubert and James L Joubert motored to Nevada City Thursday.

Mr. and Mrs. Leonard L Bishop motored to the lower country Saturday.

Fred Butz has been suffering from an injury ao his leg received while working at the Grant and Heether mill.

Wm. Stansberry returned Saturday from Sacramento.

Miss Lola Labadie left Saturday for her home at Browns Valley. Mrs. Margaret Goldthwait accompanied her on a few days visit.

Mr. and Mrs. Frank Klenzendorf Chas. and Woodrow Wilson, Chas Wilson Sr., and Vernon Klenzendorf were among those motoring to Milton on a fishing trip.

Mr. and Mrs. Levi Turner and family motored to the lower country

Fred B. Hanson and brother, Ed motored to Forest City Saturday, night continuing on to Sierra City Sunday morning.

A warrant of arrest was issued in the Camptonville Justice Court Tuesday for H. L. Hewitt, a resident of the state of Nevada for the alleged issuance of a fictitious check. Hewitt resded here about 15 years ago, and was passing thru a few weeks ago, stopping over night at which time he left the alleged bad check. The warrant was placed with the Sheriff at Marysville for the arrest of the man.

STATE FAIR EXHIBITORS' SLOGANS ARE ADVOCATED

Harold J. McCurry , director in charge of publicity, urges county exhibitors to adopt catchy slogans, tersely and graphically presenting the featured resource or attraction, to be placed across the front of their booths at the 1931 California State Fair, opening September 5th and closing September 12th. McCurry says these slogans will have great educational value in impressing fair visitors with a county's opportunities.

"California's Year Round Playground" has already been adopted as Placer County's slogan for its 1931 booth, which will feature summer and winter sports. Contra Costans Associated have initiated a contest for grammar school pupils for selecting twelve slogans, descriptive of the county and its opportunities, for the paddles of the river boat, which is to feature the Contra Costa exhibit. Shasta County's slogan is "Gateway to Lassen National Park", while San Mateo County has "Where the Climate is Best by Government Test".

MISSION ROCK PLANS ARE ABANDONED TILL LATER

Present bandonment of Mission Rock as the site for development of a shipside pre-cooling terminal, and the presentation of a plan calling for the creation of an adequate terminal at China Basin by the enlargement of present refrigeration facilities—such was the outcome of a conference Wednesday between representatives of the agricultural interests and members of the Board of State Harbor Commissioners, held at the Ferry Building.

As a result of the meeting, which involved a trip of inspection to all spots involved, the agriculturists will appoint a sub-committee of three members to carry on further negotiations with the Harbor Board. This sub_committee will also attend a meeting which the Harbor Board has agreed to call, at which local shippers and ship operators will be asked to pass on the adequacy of the latest plan.

President P. W. Meherin of the Harbor Board, who presided stated that he and his asociates on the Board were ready and willing to provide refrigreation facilities to any extent the farmers and fruit growers may need, but not necessarily Mission Rock. He then presented the plan, which the Board had worked out in collaboration with its chief engineer, Frank G. White, for the enlargement of the present terminal at China Basin.

When the meeting reconvened in the Harbor Board's offices, various members of the committee expressed themselves as surprised and pleased over the regfigeration facilities which they found were already available to the fruit growers, as well as with the possibilities of expansion of the terminal into one suitable for their future needs.

Members of the Harbor Board stated that they believed the State of California should eventually purchase Mission Rock, but that this is not the time to do so, because they feel the China Basin development will, on a much smaller investment, provide the fruit growers and farmers of the state with all the refrigerated and other space they can possibly need for many years to come.

PREMIUMS FOR GOATS AT '31 FAIR EXCEEDS $1,000

The humble goat, butt of punsters the world over, comes into his own at the 1931 California State Fair, which opens in Sacramento September 5th and closes September 12th.

More than $1,000 in cash awards are offered for the best milk and fleece goats exhibited at this year's Fair. The milk goat division, where awards total $981, include thefollowing classes: Toggenburg, Anglo_Nubian and Saanens goats ,both open and registered, and Alpine goats, open class only. The fleece goat premiums, totaling $45 are open only to Angora goats.

Medals and ribbons will be awarded also to the successful goats, while special certificates of award are offered by the International Dairy Goat Association of Lincoln, Nebraska, for champion purebreds.

AFTER COPPER ORE BUT LOCATES GOLD ORE LEDGE

W. T. Forson ,at his mine in the North Armand Lucky S sections, while sinking for copper uncovered a quartz ledge of considerable proportions which, he says, prospects "very good".

Forson has abandoned his quest for copper for the present and is uncovering the quartz ledge to explore it further. Parties are already interested in this discovery, it is said.

J. P. "Coffee John" Branley heads interests that have taken over the McIntyre group of quartz claims in North Canyon and are negotiating for other claims in the same region. —Feather River Bulletin.

BUILDERS OF CALIFORNIA

"This is my Estate"

Thousands of people—many with modest incomes—have founded substantial estates upon LIFE INSURANCE. Policies now in force in California exceed *five billion* dollars.

Seasoned in financial judgment, a life insurance company chooses its bank with as much care as its investments.

One of the world's largest companies transacts business through 60 different Bank of America branches.

And more than 25 other life insurance concerns likewise accumulate and distribute their funds through this Bank's statewide system.

Thus millions that would otherwise remain in transit are made available for increased investments in sound first mortgages and bonds.

These investments of life insurance funds—so helpful to the development of California—benefit property owners, business concerns and wage-earners throughout the state.

Bank of America does not sell life insurance, but considers it one of the most important investments. It is a major asset of many estates administered by our Trust Department . . . Have you investigated the advantages of a Life Insurance Trust? Ask any Bank of America officer in your community.

7 of the 10 largest life insurance companies operating in California are depositors in Bank of America

SALE OF BOILER STARTS INTEREST IN OLD MINE

Gold was California's first love and try as we may we cannot forget her. For instance, there is the Shasta County copper belt which, after a long period of pioneering with other metals, has gone back to the blonde charmer.

In the beginning Bully Hill and the big properties at Keswick, and Kennet were gold mines worked for the yellow metal in the gossan cappings. Then the copper deposits under the gossan came to ligt. For years their owners worshipped the auburn-haired goddess and the Shasta copper belt was one of the largest producers in the county. Then copper lost its charm and Bully Hill set up a new shrine to the pale zinc. Now gold has been reenthroned at Keswick and once more the gossan is being searched for yellow loot.

Thus turns the mining wheel

What curious turns it makes! In the Klamath mountains is a celebrated early day gold mine. It was supposed to be worked out. However, there was a good boiler in the abandoned plant. Some mining men who needed a boiler bought the mine for a song merely to get the boiler. While they were about, though, they thought they might give the old mine a tentative whirl. They were pleasantly surprised. For years thereafter the old mine presented them each month with a brick worth $40,000. Not the biggest mine but very reliable.

Then came the war and high prices of everything. The mine, too, had gotten pretty deep. Costs swallowed the output. The owners gave it up. A customer came along who needed a boiler.. They were glad to let him have mine and all for a second hand price for the boiler. The boiler was all the purchaser wanted, but he, too, was tempted to give the old mine awhirl. At last accounts he was still whirling it at a profit. Naturally everyone is now watching for the day when the old mine will play out for its present owner and he will let the property go to someone who needs a boiler. Then perhaps the story will be repeated—a tale of a boiler.

All this goes to show how short is the distance man can see into the ground. You can drift a thousand feet expecting to strike the vein with each shot and quit disgusted when one more blast would show the yellow treasure. It is this that makes the fascination of gold mining.

Another turn in gold mining in California has come out of the depression. With everything else coming down gold has gone up. This has given a distinct boost to the industry. In addition there is a boom in pocket hunting and the rummaging of neglected corners of old placer ground. A man out of work can, if he understands the business, make some kind of wages gophering the bars and benches where the old-timers passed up all but the big money. It is better than unemployment and many a man has renewed his old acquaintance with pick and pan. Possibly this has even put new life in the buro market.—San Francisco Chronicle.

VARIED FRUITS TO BE EXHIBITED AT STATE FAIR

Have you ever sunk your molars into a ripe cherimoya or a feijoa or a jujube? You have read of mangoes, guavas, sapotas, loquats and medlars, but have you ever seen them? Did you kniw that they are grown in California?

These and other subtropical fruits such as pomegranates, bananas and dates, together with citruc fruits and avocados, will be featured displays in Southern California erhibit booths at the 1931 California State Fair in Sacramento, opening September 5th and closing September 12th.

Southern California counties expected to feature these fruits at the Fair include Imperial, Los Angeles, Orange, Riverside, San Bernardino, San Diego, Santa Barbara and Ventura. Several of these will compete for the gest general county exhibit of citrus fruits, for which a first prize of a cup and $250 is offered. A second prize of $150 and a third of $100 are also offered.

State Fair premiums for oranges (twelve varieties to be sown), lemons, pomeloes (grapefruit) and limes total $900, while the awards for eleven kinds of subtropical fruits amount to $125.

For fourteen varieties of avocados once regarded only as a delicacy, but now held to be an important part of the diet, a total of $240 is offered in premiums. The following kinds of avocados will be exhibited; Fuerta, Challenge, Dickinson, Sharpless, Lyon, Linda, Queen, Taft, Dickey A, Pueblo, Mayapan, Nabal, Prince and Small Mexican.

Southern California's soil and climate are well adapted to the growing of citrus and subtropical fruits, and avocados. Even exotic bananas can be grown commercially, while Imperial dates are winning national recognition.

LOCAL HAPPENINGS

Congressman and Mrs. Harry L. Englebright and son and mother-in-law, Mrs. J. J. Jackson, motored to San Francisco Tuesday. Young Jackson Englebright remained for a 10 visit with relatives.

Mrs. Ella M. Austin, county superintendent of schools, made a trip to Oakland this week.

L. A. Smith and W. McBride of River Placers,Ltd., near the Delhi mine on the Yuba river, were Nevada City visitors Tuesday.

Mr. and Mrs. Ray Davis had as visitors, his brother, W. L. Davis and family; his mother, Mrs. Theresa Davis; Mrs. Clara Conland of Los Angeles and Mr. Davis' uncle, Jack Conway and wife of Sacramento.

Mr. and Mrs. Clay Apperson and friends of Bakersfield spent Tuesday night at the home of her parents, Mr. and Mrs. Charles Guenther They are on a camping trip that will take them to Yreka where Mrs. Apperson's brother and family reside, besides several other places of interest, before returning.

Miss Mamie Meservey of the Post Office force, is spending a two weeks vacation in Seattle, Washington. Miss Florence Meservey, a sister, of San Francisco, is spending a couple of weeks in Nevada City visiting her parents, Mr. and Mrs. W. E. Meservey.

Miss Mary Rossen, who spent the summer here with her mother, left Sunday to resume her position in the public schoils of Oakland.

Among those leaving to register at University of California are Misses Harriett Bleakley, Gertrude Marriott Helen Chapman, and Deynes Foley. All are garduates of Nevada City high school.

0

McCLISH-CURTIS NUPTIALS WERE HELD IN RENO

Miss Gertrude McClish of Nevada City and John C. Curtis of Victoria, British Columbia, were married in Reno last Saturday at the Episcopal church.

The bride is the daughter of Mrs. Georgia McClish of East Broad Street, and a graduate of the local high school with the class of 1927. She has a wide circle of friends.

The groo mis a student at University of Nevada in the school of Mines and Engineering Department. He came to Nevada City a few months ago to obtain practical knowledge in mines and mining methods. He has made a number of friends in his stay in Nevada City.

Best wishes are extended them by all their friends.

0

IT RAN ALSO

Little Naney had been visiting and the grandfather clock had made a great impression. She attempted to describe it to her mother, and said, "Don't you think we ought to have one?"

"What kind was it?" asked the mother.

"Oh, it was tall and didn't once stop wagging its tail!"

OH, WELL, NEVER MIND

"You promised me a little kiss, you said you would not care."

"That much is true, but then you see my husband's over there."

Sense

A little nonsense, now and then,
Is relished by the best of men;
But seen too oft, they take offense
And come straight back to common sense

UNIFORM HIGHWAY SIGNS ARE TO BE ERECTED

New and uniform signs designating the state speed limits on roads, in residential and business distircts through whch state arteries pass, have been approved by the highway department.

These markers, paid for by the state and erected and maintained by the California State Automobile Association and the Automobile Club of Southern California, are to be in place by August 14th, the date the new speed laws go into effect.

Black figures on a white background will be used to designate the forty-five mile per hour legal limit on highways. They will be 30 inches by 24 nches in dimension and wll be erected for the present only on main arterial routes over which the state has jurisdiction. While not reflectorized, they will be placed close enough to the lane of travel so that they mght be picked up at night by auto lights and serve as a constant reminder that the Highway Patrol will strictly enforce the new law, as announced recently by Chief E. Raymond Cato.

Mandatory signs, made so by the recent new legislative act, will be set up at the entrance to residential and business districts to the right of the road looking toward the section into whch the auto is driving. Those in residential zones will be twenty-four inches by thirty, white figures on a black background.

The first of these signs as the autoist enters a restricted district will be reflectorized.

An innovation which will meet apprival of the autoing public will be the posting at the end of a restricted zone of a sign informing the driver that he has now passed through the 25 mile limit area.

In the business district through which a state hgway passes, a similar sign notifying the autoist he is in a 20-mile zone will be erected.

TUNGSTEN AND GOLD FOUND

An extensive tungsten property consisting of eight lode claims, is being developed on the west slope of the Sierras thirty miles east of Auburn, according to Ivan H. Parker. It is owned by two miners who have done considerable development work The tungsten is found in lime which is estimated to carry eight per cent in concentrates. The slopes afford many hundred feet of backs. Three tunnels have been run at different levels on the ore body. Cavities in the ledges give from a few pounds to several hundred pounds of concentrates. A shipment of 902 pounds to a smelter assayed $76.20 and brought $429 net. With the panning of 600 pounds of concentrates, $156 in free gold was recovered. The ore can be mined by gravity and timber and water are at hand.—Placerville Herald.

SELLS-FLOTO CIRCUS TO BE IN AUBURN AUGUST 23D

Tom Mix, famous moving picture star, which is said to receive the largest salary ever paid a circus performer, will be the extraordinary feature of the Sells-Floto Circus, when that noted show appears in Auburn on August 23. Tremendous crowds, which see Mix daily, testify to the remarkable popularity of this fine American cowboy, amongst old and young alike.

As an extra added feature, the Great Peters, the man with the iron neck, will twice daily drop from the highest part of the huge tent, with his head in a regulation hangman's noose. This act is a direct importation from Europe and is being presented in America for the first time.

In the three rings and two stages will be found a complete new program of arenic features including three great riding acts, the Hobsons, the Hodginis and the Schwartz families; the Three Thrillers and Arthur Concello Trio, aerialists; Dangwills, sensational acrobats from Austria; the Hugoni Sisters from Italy; the Orantos and Suarez Brothers, daring perch artists; Berta Beeson, madcap of the wire; Wright Duo and numerous others.

Three special trains are required to transport this big show. The big top seats approximately 11,500 people, this tent requiring an area of 250 feet by 500 feet. Performances are announced for 2 p. m. and 8 o'clock with the main doors to the double menagerie opening an hour in advance.

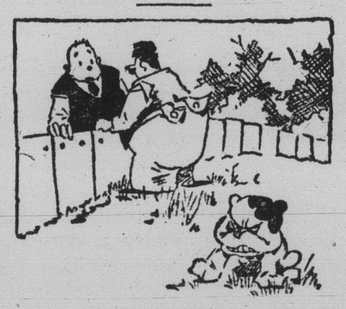
0

Finally

"I love being with Tony. He entertains me by talking about things other men never mention."

"Oh, has he proposed to you?"—Tit-Bits.

NOT A COW-DOG



First Neighbor—"Why didn't your dog run that cow out of your garden then?" Second Neighbor—"Beneath his dignity—he's a bulldog, you know."

He Takes the Count

Some wives may count
Their husbands' calories,
But they all count
Their husbands' salaries!

It Had Come Back

Friend—Do you think the great outstanding American poem has yet been written?

Poet—It has not only been written, but it has been rejected!

Cured

His pockets bulging with money at the end of the cantaloupe season, an Imperial valley rancher came up to Los Angeles and presented himself at a rather ornate downtown office.

"Be this the woman's exchange?" he asked doubtfully.

"It is," replied the woman in charge.

"Be you the woman?"

"I am."

"Well, darned if I don't keep Sally!" spluttered the rancher making a hasty exit.

DR. MILES' Liquid NERVINE

All Wrought Up Over Nothing

Didn't sleep last night; too much work; the children are fretful; the Boss is cranky; Mrs. DeVere didn't invite you to her party.

Ordinarily you don't mind any of these things, but today they are simply unbearable. You are nervous, that's why.

Did you ever try Dr. Miles' Nervine? Just two teaspoonfuls in a half glass of water will quiet your over-taxed nerves and bring you a feeling of calm and peace.

Dr. Miles' Nervine is now made in two forms—Liquid and Effervescent Tablet. Both are the same therapeutically.

At all Drug Stores. Price $1.00

WEEKS-GHIDOTTI WEDDING RITES RENO WEDNESDAY

Miss Lena Ghidotti, daughter of Mr. and Mrs. John Ghidotti and Marvin Weeks, son of Mr. and Mrs. Lyman Weeks, were united in marriage in Reno Wednesday.

The bride is a popular and attractive girl, having been reared in Nevada City. She attended and graduated frob both grammar and high schools, later attending Healds Business College in Sacramento.

The groom is a graduate of Merced high school, recently passing the state pharmacy test. He has won quite a name as a baseball play. He lived in Nevada City at one time.

A honeymoon will be spent motorin to various points of interest in Nevada and the Yosemite Valley, before returning for a short visit here. They will make their home in Merced. The best wishes of the community go with these young people.

OFFICERS ARE SEEKING TRUCKEE SLAYER CLUES

Sheriff Carter and Deputy Rickard returned from Truckee after making a thorough search and finding no clue as to the whereabouts of Louie Jiminez, the alleged slayer of Gil Ramero in what is said to have been a brawl at midnight Sunday. It was learned that he has a sister at Madera, and it may be he is making his way to that place.

Very little information was gained from friends of both men in the camp.

An autopsy held last night showed that two of the five shots fired had taken effect, one in the heart and one in the lower part of the body. The body is being held awaitink wird from relatives, the nearest of whom is a brother in Mexico.

CAMP FIRE ACTIVITIES OVER FOR SEASON

Camp Fire activities are over at Lake Vera for the 1931 season. 106 girls left Camp Celio last week. A case of scarlet fever in camp delayed the departure of the girls for four days.

During the summer Camp Augusta of Piedmont group held a 3 weeks camp of their members; Camp Sacramento a 10 day camp; and Camp Celio with four groups of about 125 each. More than 700 girls enjoyed a vacation at Lake Vera this season. They are all looking forward to a return next year.

It is to be hoped that Nevada City will have a camp on Lake Vera next year.

YUBA PASS CLOSED TO TRAFFIC AT NIGHT

Yuba Pass is again closed to traffic from 5 p. m. to 8 a. m. daily, due to construction between Downieville and Shady Flat. This is according to the National Automobile Club. This schedule is expected to be in effect until September 10th

Provision will be made for allowing traffic through whenever possible, but it is not advisable to plan to drive over this stretch after 5 p. m. as blasting is likely to keep the road closed all night. It is anticipated that surfacing will be started early in September and probably will not be completed until late in the season.

TALKIES AT NEVADA THEATRE DRAW CROWDS

Good crowds are attending the "Talkies" at the Nevada Theatre. Mr. Tamblyn is showing a line of high class pictures, and when "Daddy Long Legs" was shown last week for two nights in succession there was hardly seating room in the theatre for the crowd on each night.

The machine is a good, clear one and many are the praises heard on the pleasant times enjoyed at the "Talkies."

AMADOR PLANS EXHIBIT OF GOLD AT STATE FAIR

Mrs. Warren E. Reed, chairman of the committee in charge of the Amador County exhibit at the forthcoming state fair, and Miss Dorothy Sargent, president of the Jackson Woman's Club, have visited a number of mining properties of this county during the past week in an effort to secure mineral specimens for the display at the state fair. The ladies have been successful in securng a number of specimens.

The exhibit from Amador county at the fair this year will feature the mining industry extensvely. The interest in the gold mining industry at the present time has prompted this effort. Along with ore from the larger mines of the county an effort is being made to secure quartz from the smaller prospects and the committee has promise of some interesting specimens. The booth will show the method of operation in mining gold in the larger properties of the county.

KATZERS TO MAKE HOME IN DOUGLAS, ARIZONA

A letter received from Mrs. S. M. Katzer early this week, directing change of address for The Nugget states that they are going to like their new home in Douglas, Arizona very much.

They recently sold their fine property on Long Street to Joe Moscatelli, who is going to make it into a two apartment dwelling.

Mr. and Mrs. Katzer moved from Nevada City on account of Mr. Katzer's health, thinking the drier climate would be beneficial to him.

We were sorry to see them leave but best wishes go with them for health, happiness and success in their new home.

TAHOE RESIDENTS HAPPY OVER STEADY RAIN

A steady rain fell early Wednesday morning at Tahoe City, settling fire hazards for some time.

The indications for continued wet weather are welcome on account of dry springs and streams and the low lake level.

A very light shower fell in Nevada City Wednesday morning and there was not enough to cool the atmosphere to any great extent.

GRASS VALLEY PERSONALS

Earl Covey was in Marysville last night attending a meeting of Penney Company managers

Mr. Davidson of the Crocker Co., was in Grass Valley calling on his regular trade.

Mr. James Prisk is leaving Grass Valley next week for England for six months.

J. C. Penney Co. have a window of winter sports equipment arranged at the Grass Valley Chamber of Commerce window advertising the Ski Club Dance at Lake Olympia on August 20th.

D. L. Beard of Napa, who is vacationing at Gold Lake, spoke before the Lion's Club recently.

Mrs. Tony Lavezzola and children Peter and Betty, Mrs. Josephine Tomola, postmistress of Downieville, and her mother, Mrs. Tomola, passed through Grass Valley on their way to San Francisco, where they will spend a couple of weeks vacationing.

HIGH OUTPUT LOOKED FOR DURING SEASON 1931

Deep quartz mining continues active in the Grass Valley mining district, with every indication that the production of approximately two million dollars in 1930 will be exceeded in 1931. So far as disclosed, all of the producing mines are in good ore, with indications that the present high production will be continued for an indefinite period.

The Empire-Star Mines, Ltd., a merger of the Empire ,Pennstyvania and North Star properties, each a large producer, continues as the leading exponent of the local mining industry. The sixty-stamp Empire plant is being operated to capacity, ore being brought by aerial tramway from the North Star to the Empire. The North Star reduction plant is being used in part to handle the ore of a group of leasers.

The most encouraging reports continue to come from the rehabilitated Idaho-Maryland, where reduction to capacity continues at both the Idaho and the Brunswick plants. It is stated that experiments are still under way with reference to what may be a central plant of large capacity and modern design.

The Grass Valley Boundary is reported in good ore, samples displayed along the streets indicating high values. This property was recently inspected by Utah mining men who are reported to have had some consolidation plan under consideration.

Other properties under development include the Alcalde and Newtown, each of which is to have deeper shaft development.

W. E .COOK WAS BUSINESS VISITOR IN NEVADA CITY

Mr E. B .Cook of Oakland came up Tuesday and spent until Wednesday afternoon attending to business matters .He visited with his parents-in-law, Mr. and Mrs. J. B. Young.

Mr. Cook is a native of Nevada City and always enjoys a visit with relatives and friends. He was employed by the General Electric company for four years an an engineer. He is now a battery salesman.

MISS MADELINE THOMAS AND WILLIAM JOHNSON WED

Friends were surprised to learn that William Johnson a,nd Miss Madeline Thomas had slipped quietly away to Reno last Thursday and were married. After a short honeymoon at Lake Tahoe they will return to Grass Valley. In the fall Mrs. Johnson will returne to Washington, D. C. to a theatrical engagement.

Wm. Johnson, geologist for the U. S. Geological Survey has been entrusted with the project of adding to the Lindgren report in bringing the underground vein system of the Empire-Star Mines Co.,

This is Mr. Johnson's second year in Grass Valley, and his friends extend best wishes.

CLERKIN PRESENTS MAP TO THE NUGGET OFFICE

Mr. W. P. Clerkin of French Corral was a Nevada City visitor Monday. He presented The Nugget office with a map showing a portion of the Alleghany Mining District, which will be a welcome addition to the mining maps we now have on display in the office.

HELEN TREVETHICK BRIDE ON SATURDAY NIGHT

At a quiet wedding at the Methodist parsonage aSturday night Miss Helen Trevethick of this city became the bride of Milton R. Keiffer of Sacramento. Immediately following the ceremony which was witnessed by the immediate members of the families. The wedding party adjourned to the home of the bride's parents where a wedding reception was held. The couple were attended by Miss Adale Deal ,sister of the bride and Roy Keiffer, brother of the groom.

Mrs.. Keiffer, the daughter of Mr. and Mrs. S.. S. Trevethick was a graduate of Nevada City High School with the class of 1924 after which she attended Healds Business College. For the past four years she has served Congressman Englebright in the capacity of secretary during the adjournment of congress.

The young couple will reside in Sacramento where the groom has a responsible position with the Southern Pacific.

JACKSON'S GROCERY ADDS VEGETABLE, FRUIT STAND

Jackson5s Store has installed a fruit and vegetable stand to their regular line of groceries. This will be a welcome addition to the popular store and the customers will be glad to know that they may now add fruit and vegetables to their list of staples when they ring Nevada City One.
